Mylena *Santos*

Senior Frontend Engineer & Technical Lead

myleena.santos@icloud.com
linkedin.com/in/mylenasantos

PROFILE

10 years in software engineering and over 5 years in technical leadership, working at the intersection of frontend engineering, architecture, people development and product thinking. I modernize frontend architectures, improve performance and accessibility, and build autonomous engineering teams that deliver meaningful results.

EXPERIENCE

Tech Coordinator / Tech Lead · Incentivar

Apr 2020 — Present

- Lead engineers through people management, mentoring, IDPs and one-on-ones.
- Own technical strategy and roadmap, including the frontend platform migration from Create React App to Next.js.
- Led the technical direction of the Incentivar Marketplace rebuild on Next.js.
- Drove an accessibility initiative for Coca-Cola FEMSA that raised the Lighthouse accessibility score above 90.
- Established engineering processes, standards and technical documentation.
- Worked on an account recovery microservice with NestJS, TypeORM and AWS Lambda.

Frontend Software Engineer · Incentivar

May 2019 — Apr 2020

- Built and evolved React frontends for the product.

Mid-Level Software Developer · Xplor Business Solutions

Sep 2017 — May 2019

- Developed web applications and integrations, including REST and SOAP services.

Junior Software Developer · Xplor Business Solutions

Software Development Intern · FATEC

Mar 2016 — Jul 2017

SKILLS

Frontend — React, React Native, Next.js, TypeScript, JavaScript, Gatsby.js, Material UI

Backend — Node.js, NestJS, Microservices, REST APIs, SOAP, AWS Lambda, TypeORM

Quality — Accessibility, Google Lighthouse, Unit Testing, Performance, Engineering Standards

Leadership — Technical Strategy, Mentoring, People Management, Roadmaps, Stakeholder Management, Scrum

AI-assisted development — Claude, AI-assisted coding, Development Automation

EDUCATION

FATEC
Systems Analysis and Development
