SUMMARY

Senior Frontend Engineer and Tech Lead with 10 years of experience in software engineering and 5+ years leading engineering teams. Specialized in React, Next.js and TypeScript: modernizing frontend architecture, improving web performance and accessibility (WCAG), and building scalable component systems for enterprise clients such as Coca-Cola FEMSA and Nestlé. Combines hands-on engineering with people leadership, technical strategy and close collaboration with product and stakeholders. Uses AI-assisted development (Claude) to speed up delivery while keeping code quality high.

SKILLS

Frontend: React, Next.js (SSR, SSG), TypeScript, JavaScript (ES6+), React Native, HTML5, CSS, Material UI, Gatsby.js, component architecture, design systems

Quality and performance: Web accessibility (WCAG), Google Lighthouse, web performance, unit testing, code review, engineering standards

Backend and cloud: Node.js, NestJS, REST APIs, SOAP, microservices, AWS Lambda, TypeORM, SQL Server

Leadership: Technical leadership, people management, mentoring, 1:1s, individual development plans, technical roadmaps, stakeholder management, Agile and Scrum

AI-assisted development: Claude, AI-assisted coding, development automation

EXPERIENCE

Tech Lead **Apr 2021 – Present**

Incentivar.io, São Paulo, Brazil

- Lead a cross-functional engineering team building B2B incentive and marketplace products for enterprise clients, including Coca-Cola FEMSA and Nestlé.
- Led the migration of the frontend platform from Create React App to Next.js, introducing server-side rendering where it mattered, strict TypeScript and shared conventions, without pausing product delivery.
- Technical lead on the Incentivar Marketplace rebuild in Next.js, React and TypeScript; designed the reusable component and data-fetching architecture.
- Drove an accessibility initiative for Coca-Cola FEMSA that raised the Google Lighthouse accessibility score above 90, using WCAG as the standard.
- Design and review system architecture, document technical decisions, and guide engineers through trade-offs.
- Created engineering standards, code review guidelines and technical documentation that made onboarding faster and gave the team more autonomy.
- Contributed to an account recovery microservice built with NestJS, TypeORM and AWS Lambda.
- Manage and develop engineers through regular 1:1s, individual development plans and delegated project ownership.
- Run the team's Agile process (planning, refinement and retrospectives) and shape the product roadmap, balancing new features with technical debt.
- Awarded 2nd place, Best Leadership Award, Incentivar (2022).

Frontend Developer **May 2019 – Apr 2021**

Incentivar.io, São Paulo, Brazil

- Built and maintained web and mobile applications with React and React Native for enterprise clients, including Coca-Cola and Nestlé.
- Developed SEO-friendly websites with Next.js and implemented user interfaces with Material UI.
- Worked in Scrum sprints with planning, daily standups, reviews and retrospectives.

Software Developer **Jan 2019 – May 2019**

XPLOR (Xplor Business Solutions), São Paulo, Brazil

- Built Sage X3 ERP customizations and integrations, including REST and SOAP web services and C# integrations.
- Developed client-specific reports with Crystal Reports and trained clients and new developers on best practices.

Junior Software Developer **Sep 2017 – Jan 2019**

XPLOR (Xplor Business Solutions), São Paulo, Brazil

- Developed Sage X3 ERP features, SQL Server queries and client dashboards; maintained REST and SOAP web services.

Software Development Intern **Mar 2016 – Jul 2017**

FATEC, São Paulo, Brazil

EDUCATION

Technology Degree in Systems Analysis and Development, FATEC (Faculdade de Tecnologia), Brazil

Technical Degree in Information Technology, CTMA, Brazil

Technology Leadership Development Program, FORJA
